SUITABLE CROWD

OFFICE WORKER

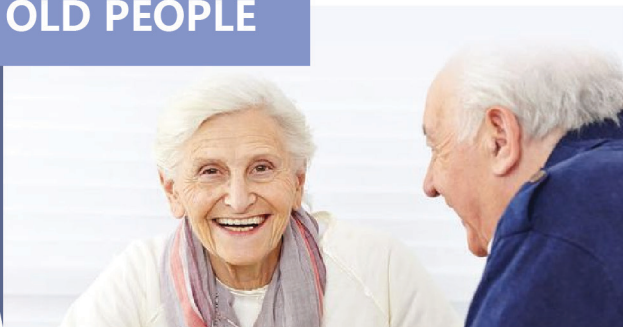

Work pressure is heavy, there is endless work every day. **There is almost no time for exercise**
The toxins in the body will accumulate quickly
The body function declines rapidly, causing acne on the face.

BEAUTY GIRL

Many women never forget to dress up before going out. Cosmetics **cause poor skin condition**
acne and pigmentation. So it is very necessary to detoxify the body regularly

OLD PEOPLE

Older people decline in physical function as they age. **The functional balance system gradually weakens and easily leads to poor excretion**
The elderly need to detoxify the body more often.

THE MAN

Most men can't avoid socializing in order to support their families. **Both tobacco and alcohol is no avoidable. Only detoxify regularly and regulate the body. In order to pass your age with high quality**

Is detoxification really that important?

When toxins cannot be excreted, they will be transformed into various forms such as stool, fat cholesterol, blood stasis, etc. And lodge in the body. These toxins can cause more serious diseases. Modern people eat too much processed food and drugs, making the body too late to metabolize and decompose, causing toxins to accumulate in the body. Accumulation of toxins over time will erode the viscera, destroy cells, and block the channels for cells to absorb nutrients and metabolic waste. Causes body problems such as headache, backache, fatigue, decreased resistance, etc.

THE OLDEST AND MOST ANCIENT HOLY TREE IN THE WORLD

Baobabs are also one of the longevity stars in the plant world

In the arid and harsh environment of the savanna, its life span can still reach about 5000 years. According to data in the 18th century. The famous French botanist Adamson saw some baobab trees in Africa. The oldest one has lived 5500 years. According to local folklore, the Baobab tree is the "ancient tree".

Baobabs have the reputation of "Tree of Life"

It is precisely because of it that countless Africans can survive the dry season of water shortage, if there is no baobab tree. Africans will die in large numbers in the absence of water, so the baobab tree has the reputation of being the tree of life. It deserves its name. Not only that, the fruit of the baobab tree can be eaten, and its trunk can even be used as a house!

The fruit of the Baobab tree is rich in vitamins, antioxidants and fiber. And every part of the tree is valuable, including the leaves, which is a nutritious vegetable.
